## **OBJECTIVE**

Hi, I'm Waleed , a full stack developer passionate about building clean, user-focused digital products. I specialize in Laravel with modern front-end frameworks like React Js, Vue Js and Inertia Js tailwindcss, while continuously expanding my full-stack expertise. I have hands on experience with React Native as well, giving me exposure to mobile development. I enjoy turning ideas into functional products , from building robust backends to crafting smooth UIs and solving complex problems. Always curious, always learning.

Let's connect and create something impactful together.

## **EXPERIENCE**

### **Full Stack Developer at HubQ Corporate Services**

**Mar 2025 – Present**

- Led development tasks, managed VPS, and mentored junior developers.
- Built new modules and resolved issues in a Laravel + Blade + Vue.js HRM web portal.
- Integrated REST APIs and implemented secure file storage using AWS S3.

### **Laravel Developer at ADMK Solutions**

**Aug 2024 – Feb 2025**

- Developed and maintained Laravel-based web apps.
- Built and consumed APIs, improved backend speed, and handled authentication/security.
- Worked with teams to deliver production-ready features.

### **Laravel Developer at Uzair Technology**

**Feb 2023 – Jul 2024**

- Created custom web solutions using Laravel.
- Focused on clean code, reusable components, and fast delivery.
- Handled end-to-end development for client projects.

## **PROJECTS:**

### ➤ **HRM Web Portal**

- Maintained and enhanced a multi-tenant HRM platform with new modules and updates.
- Redesigned database schema for multi-tenancy, improving scalability and resource efficiency.
- Migrated Blade templates to Vue.js/Inertia.js, turning the platform into a SPA.
- Developed modules for payroll, time-off, HR documents, complaints, and dynamic fields.
- Integrated AWS S3 for secure file storage and Cloudflare for security and performance.

### ➤ **HubQ Website (hubq.ae)**

- Company website built with Laravel, React, and Inertia.js.
- Includes dynamic services, policies with versioning, and content updates.
- Integrated GSAP animations for a modern, interactive user experience.

### ➤ **HRM Mobile App**

- Cross-platform HRM application built with React Native.
- Provides employees access to loans, time-off, reimbursements, and dependents.
- Uses secure Laravel APIs for authentication, payslip downloads, and news feed.

### ➤ **Flatokapi.com**

- Developed the backend of a property listing website using Laravel and Inertia.js (Vue).
- Integrated Stripe for payments and managed listing-based subscription plans.
- Implemented multi-agency switching with isolated data, similar to multi-tenancy.

- **EventCentral.net**
  - Built a full-stack platform using Laravel, React, and Inertia.js.
  - Added role-based access control, real-time updates, and a single-page app experience.
  - Designed and integrated RESTful APIs to support mobile applications.
- **VovoPlay.com**
  - Developed a gaming platform inspired by GameDom using Laravel and React JS with Inertia.js.
  - Integrated PayTabs payment gateway for subscription plans using Auth and Capture transactions.
- **GameDom.fun**
  - Built an online gaming platform offering diverse games with Laravel and React JS (Inertia.js).
  - Integrated MTN subscription via ComViva, coin distribution, friend networks, and badge system.
- **Shigoo Laundry App**
  - Created REST APIs in Laravel for a multi-vendor laundry service platform.
  - Integrated order management, delivery tracking, and vendor coordination for the mobile app and admin dashboard.
- **AI CoverGen**
  - Built an AI voice cover generation site with Laravel, Livewire, and TailwindCSS.
  - Integrated Stripe for secure payments, job scheduling for automated tasks, and AWS for file storage & uploads.
- **TechTrack Advisor**
  - Built a career guidance platform to help beginners choose paths in the tech industry.
  - Used Gemini API to generate learning roadmaps and an AI model for personalized career suggestions in Pakistan.
  - Designed the platform as a “career GPS” to guide newcomers in the fast-changing tech field.
  - Tech Stack: Laravel, Livewire, Blade, Tailwind CSS

## **EDUCATION**

**BSCS @ KOHAT UNIVERSITY OF SCIENCE & TECHNOLOGY**

(2020 – 2024)

## **SKILLS**

- |                |              |                    |
|----------------|--------------|--------------------|
| • Laravel      | • React JS   | • VPS              |
| • React Native | • Vue Js     | • Payment Gateways |
| • Tailwind CSS | • Bootstrap  | • Stripe           |
| • Rest API     | • PHP        | • GitHub           |
| • CSS          | • JavaScript | • Cloudflare       |
| • Click Up     | • Alpine JS  | • MySQL            |
| • S3           | • Inertia JS |                    |
